Subject: Update from Southwestern Energy

Hi Jeanne and Cyndi,

I just spoke with Doug Melton at SWN and he told me that they are in the process of projecting their FY 15 drilling program right now and cannot give us a list of potential sites until they complete that process. They estimate they will be done with that about a month from today, Oct. 12th. He stressed they are still committed to working with us on this project but that because we don't want to be on a well that is scheduled for drilling until 15 months from now, that their current drilling program doesn't make projections out that far, so they are having to complete this new planning process before they can identify potential targets.
